Projects

Task Management RESTful API

2025

Backend Project

Python • Flask • SQLAlchemy • PostgreSQL • Docker

- Developed a RESTful CRUD API using Python, Flask, SQLAlchemy and PostgreSQL.
- Modeled relational entities and implemented create, read, update and delete operations.
- Structured the project using modular architecture with Blueprints for better maintainability.
- Containerized the application with Docker and Docker Compose for consistent environments.

Economic Risk Monitor

2026

Data Engineering and Dashboard Project

Python • SQL • SQLite • pandas • Streamlit • Plotly • pytest

- Built an end-to-end pipeline using the World Bank API for extraction, transformation and analysis of economic indicators.
- Structured Raw, Silver and Gold layers for data organization and standardization.
- Created an interactive dashboard using Streamlit and Plotly for economic analysis and country comparison.
- Implemented automated data quality validation using pytest.

Job Application Tracker

2026

Web / Dashboard Project

Python • Streamlit • pandas • CSV

- Developed a Streamlit web application for managing and tracking job applications.
- Implemented filters, metrics and analytical views using pandas.
- Organized candidate workflow data and improved application tracking through dashboard visualization.

Public Tender Monitoring Bot

2026

Automation Project

Python • BeautifulSoup • SQLite • Telegram Bot API

- Developed a Python bot for automated monitoring of IT-related public tenders.
- Implemented web scraping with BeautifulSoup4 and SQLite persistence to prevent duplicate records.
- Integrated Telegram Bot API for real-time notifications.

Skills

- **Programming:** Python, SQL, C#, basic JavaScript, HTML, CSS
- **Backend and Web:** Flask, REST APIs, SQLAlchemy, API integration, basic Django knowledge
- **Databases:** PostgreSQL, MySQL, SQLite, relational modeling, SQL queries
- **Tools:** Git, GitHub, Docker, Docker Compose, Linux, Windows, Streamlit
- **Data and Automation:** pandas, web scraping, BeautifulSoup4, process automation
- **Best Practices:** modular architecture, technical documentation, pytest testing, version control

Education

Estácio Parangaba

Fortaleza, CE, Brazil

Bachelor's Degree in Computer Science

2025 – Present

Languages

- **Portuguese:** Native
- **English:** Advanced – C1
